

State of Health in the EU Poland Country Health Profile 2021

Figure 10. The numbers of practising doctors and nurses in Poland are among the lowest in the EU

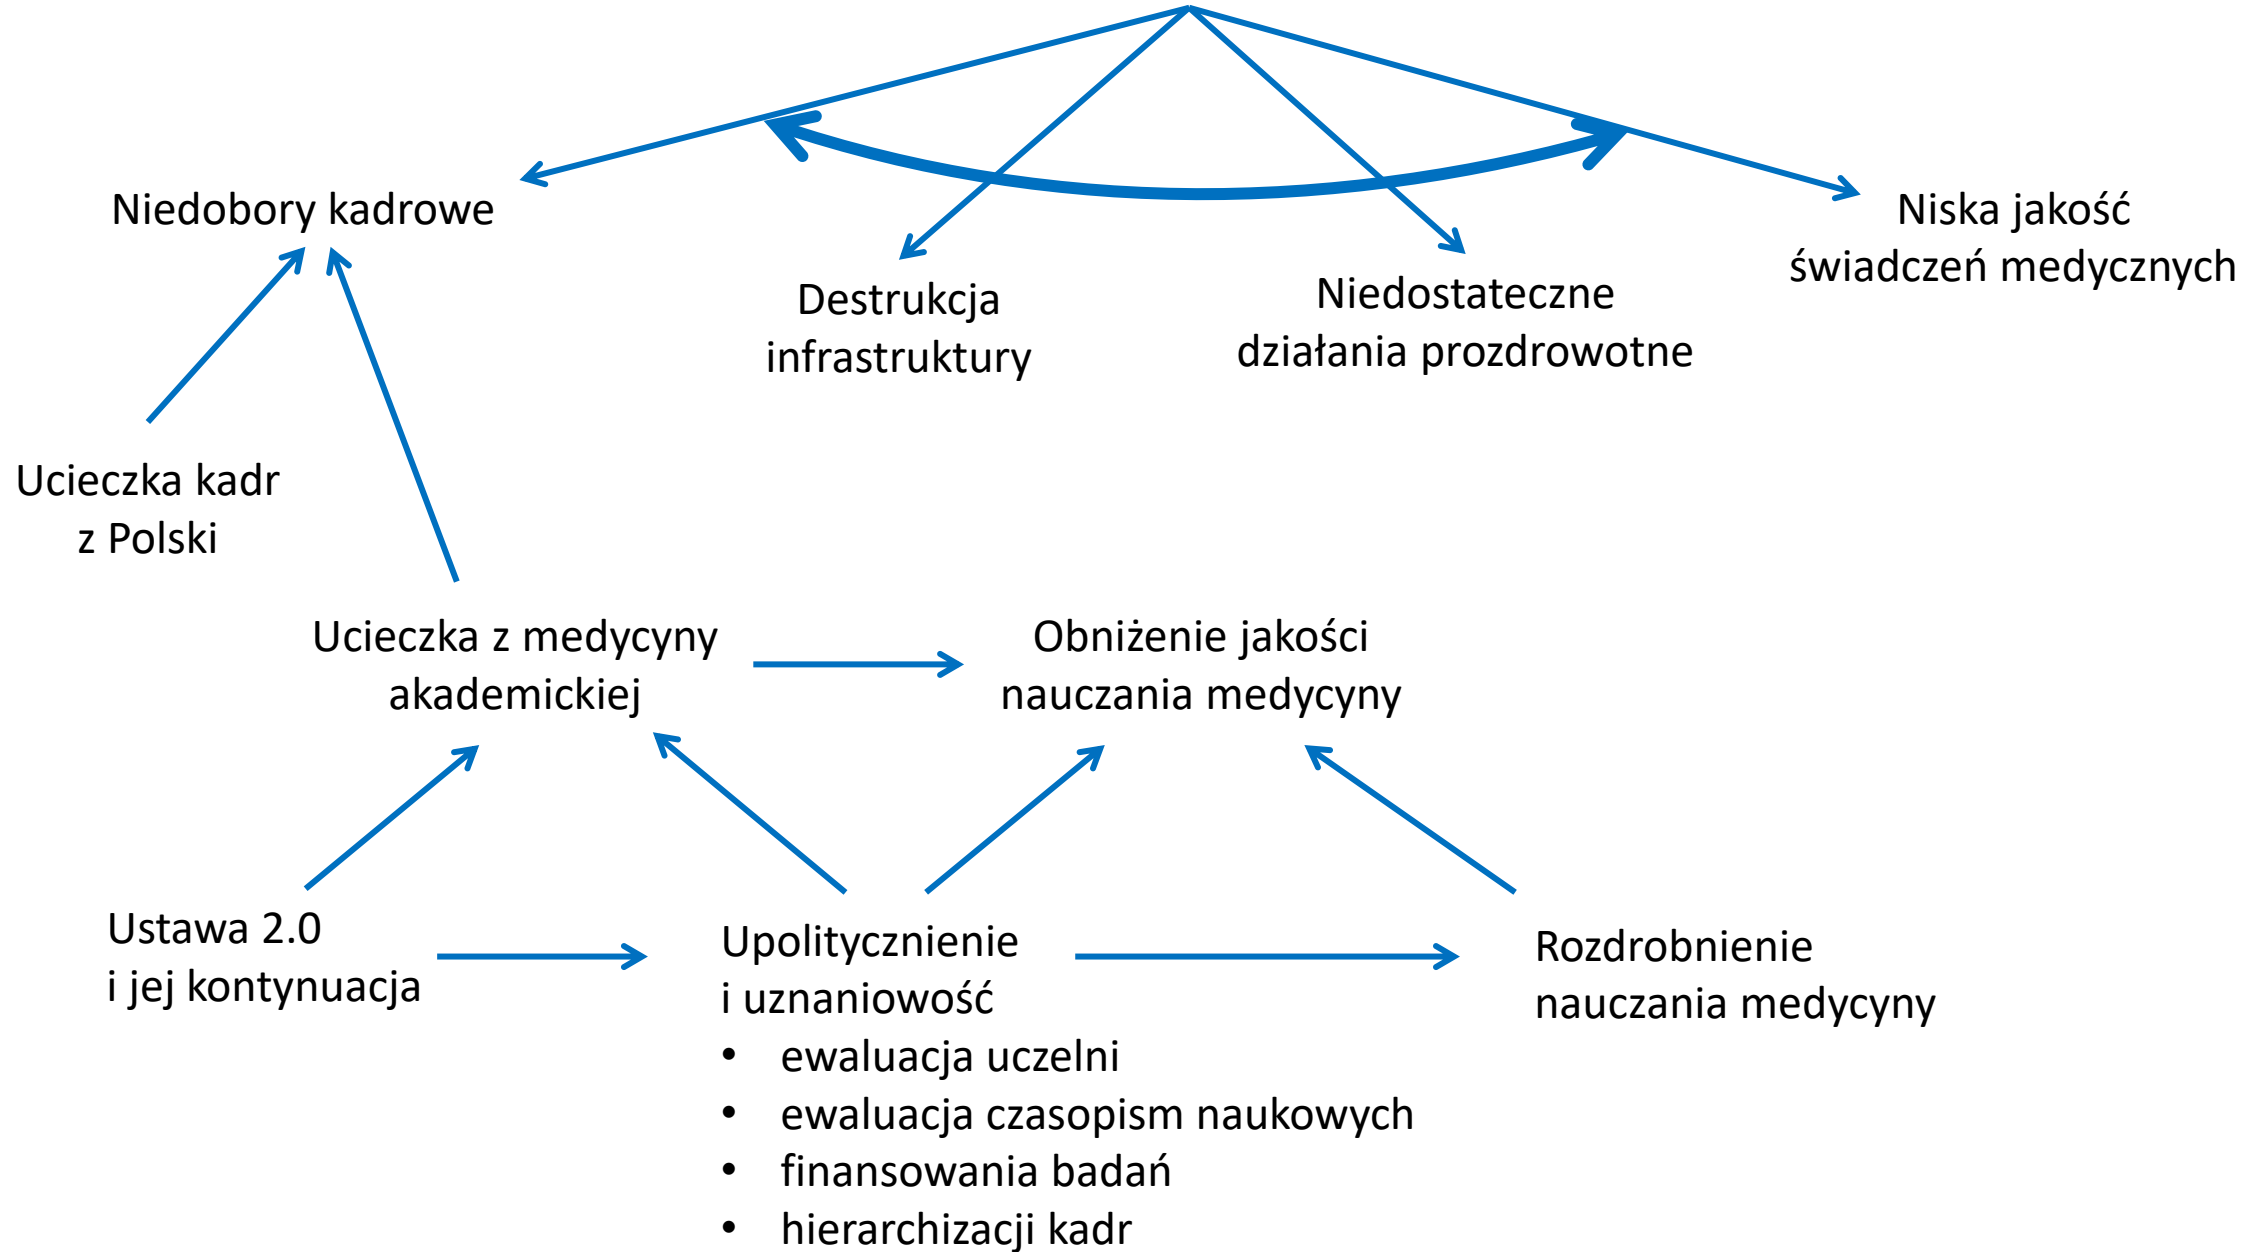

Note: The EU average is unweighted. In Portugal and Greece, data refer to all doctors licensed to practise, resulting in a large overestimation of the number of practising doctors (e.g. of around 30 % in Portugal). In Greece, the number of nurses is underestimated as it only includes those working in hospitals. Source: Eurostat Database (data refer to 2019 or the nearest year).
